

# City Form / Urban Design:

**Ken Greenberg**  
**Greenberg Consultants Inc.**

**Neil Kittredge**  
**Beyer Blinder Belle**

## **ABOUT THE AUTHORS OF THIS PRESENTATION**

Ken Greenberg is an Architect/Urban Designer and has played a leading role on a broad range of assignments in highly diverse urban settings in North America and Europe. Much of his work focuses on the rejuvenation of downtowns, waterfronts, neighborhoods, and campus master planning. His projects include the award-winning Saint Paul on the Mississippi Development Framework, the Brooklyn Bridge Park on the East River in New York and the Fan Pier in Boston, the Southwest and Southeast Waterfronts in Washington, D.C., North Point/Lechmere Square in Cambridge and the East River waterfront in Lower Manhattan. Current new efforts include the Downtown Master Plan for Fort Lauderdale, and the renewal of Regent Park, a major public housing project in Toronto. In each city, with each project, his strategic, consensus-building approach has led to coordinated planning and a renewed focus on urban design.

Neil Kittredge is an Associate Partner at Beyer Blinder Belle Architects & Planners LLP in New York City. Mr. Kittredge has worked as an architect and urban designer on projects including the Anacostia Waterfront Initiative in Washington DC, the World Trade Center site in Lower Manhattan, downtown plans for Fort Lauderdale, Florida and New London, Connecticut, and campus plans for Indiana University and the State University of New York. A graduate of the Carnegie Mellon University School of Architecture and the Harvard University Graduate School of Design, Mr. Kittredge is a member of the American Institute of Architects and the American Institute of Certified Planners, and is a registered architect in the State of New York.
